PROJECTS

PizzaOrder(ReactJs)

This project is based on Dynamic data(Api/JSON) where landing/home is there and multiple pizza images is appear using dynamic data coming from backed site and user can also add to cart their favorite pizza once they add items to cart-page, they can watch separately their pizza details like price , size and amount and can also manipulate its details Easily

Weather ReactApp

Real Time Data is fetched using Dynamic API where user can search any country/state name to get real time info about weather

Foodsite

This foodsite is done by ReactJs where different category of food is available and which is done through static Api/JSON data

Groom Yourself

This Project is Done by ReactJs having multiple pages using react router, having landing page/home page where beautiful animation is used for look and feel also used static Api for rendering services with images/details

News Tech

This website serves the real time info about TECH and has pagination feature and for state management i have used context Api and useReducer{Hook} to being updated

ToDoList usint React Js

This is complete ToDOList using ReactJs where all major CRUD operations can easily performed..

PERSON ASSISTANT (Jarvis)

I have made a personal assistant (Jarvis) in python programming in this project we can play the song by speaking to Jarvis like Jarvis play the music, it can also open the browser like YouTube, Google etc by voice recognition
